FOOD ESTABLISHMENT INSPECTION FORM

FACILITY NAME Wendy's #10809				DATE 5/21/2024	TIME IN 2:30 PM	TIME OUT 4:35 PM
ADDRESS 12671 Moreno Beach Dr, Moreno Valley, CA 92555				FACILITY DESCRIPTION Not Applicable		
PERMIT HOLDER Cotti Foods California Inc				EMAIL wn010809@cottifoods.net		Major Violations 2
PERMIT # PR0064672	EXPIRATION DATE 05/31/2024	SERVICE Routine inspection	REINSPECTION DATE Next Routine	FACILITY PHONE # (949)858-9191	PE 2621	DISTRICT 0017
INSPECTOR NAME Tamia Davidson					Points Deducted 10	

The conditions listed below correspond to violations of the California Health and Safety Code and/or Riverside County Ordinances and must be corrected as indicated by the enforcement officer. The Department of Environmental Health appreciates your cooperation.

Failure to correct listed violation(s) prior to the designated compliance date may necessitate an additional reinspection at a charge determined by Riverside County Ordinance 640.

Major / Minor Violations: Major Violations are those that pose an imminent risk to public health and warrant immediate closure of the food facility or immediate correction. Minor Violations are those violations that do not pose an imminent public health risk, but do warrant correction.
GRADE REPRESENTS THE FOLLOWING RANGES: A = 100-90 Passed inspection / meets minimum health standards. B = 89-80 Did not pass inspection / does not meet minimum health standards. C = 79-0 Failed inspection / conditions exist which may pose a potential or actual threat to public health and safety. The facility is required to display a grade card in a conspicuous place selected by the Enforcement Officer. The grade card shall not be concealed and can only be removed or relocated by the Enforcement Officer per County Ordinance 492 / County Code Section 8.40.020

In = In compliance COS = Corrected on-site N/O = Not observed N/A = Not applicable OUT = Out of compliance

FOOD ESTABLISHMENT INSPECTION FORM

FACILITY NAME Wendy's #10809	DATE 5/21/2024	PERMIT # PR0064672
---------------------------------	-------------------	-----------------------

7. PROPER HOT & COLD HOLDING TEMPERATURES **⚠ CRITICAL ⚠**

POINTS
4

Inspector Comments: Potentially hazardous foods shall be held at or below 41°F or at or above 135°F.

Measured a small metal container of cut tomatoes at 52F in the walk in cooler. Per operator, the tomatoes were sliced then placed directly into the walk in cooler. All other food items in th walk in cooler were measured to be 41F or below. Operator voluntarily discarded the tomatoes. Ensure all potentially hazardous food items are maintained at 41F and below or 135F and above.

Violation Description: Potentially hazardous food shall be held at or below 41°F / 45°F or at or above 135°F. Potentially hazardous food removed from proper holding temperature during preparation must be returned to proper temperature within 2 hours. Potentially hazardous food shall be received at proper temperature without evidence of temperature abuse. (113996, 113998, 114037)

14. FOOD CONTACT SURFACES; CLEAN AND SANITIZED **⚠ CRITICAL ⚠**

POINTS
4

Inspector Comments: Wash water shall be maintained at a minimum of 100°F to facilitate proper washing of food contact surfaces. Food contact surfaces shall be properly sanitized using one of the following methods: 100ppm chlorine for 30 seconds; 200ppm quaternary ammonia for 60 seconds; or 25ppm iodine for 60 seconds.

Observed the wash and sanitize compartments of the 3-compartment sink to be filled with water indicating active ware washing. The wash water was measured at 95F and the sanitizer compartment was measured to have 0ppm of quaternary ammonium. Observed multiple dishes soaking in the wash compartment and one dish fully submerged in the sanitizer compartment. Operator corrected the water temperature to 100F and increased the sanitize compartment to 200ppm quaternary ammonium. Maintain wash water temperature at 100F and sanitizer concentration at 200ppm quaternary ammonium in the 3-compartment sink when the 3-compartment sink is set up for ware washing. Re -ash, rinse, and sanitize the dish that was submerged in the sanitize compartment.

Violation Description: All food contact surfaces of utensils and equipment shall be properly cleaned and sanitized. Food contact surfaces shall be clean to the sight and touch, no accumulation of dust, dirt, food residue, and other debris. (114097, 114099.1, 114099.2, 114099.4, 114099.6, 114099.7, 114101(b-d), 114105, 114109, 114111, 114113, 114115, 114117, 114118, 114123, 114125(b), 114130.2, 114130.5, 114141)

36. EQUIPMENT / UTENSILS PROPERLY INSTALLED, CLEAN;ADEQUATE CAPACITY

POINTS
1

Inspector Comments: All equipment and utensils shall be kept clean and free of an accumulation of dust, dirt, food residue, and other debris.

Observed icicle build up on the drain line of the walk in freezer fan box. The icicle has grown so that it is now contacting a box of frozen tortillas. Remove the icicle build up and evaluate any potential leak.

Violation Description: All utensils and equipment shall be clean and installed in an approved manner. Equipment type and quantity shall be adequate for the operation.(114115, 114130.3, 114139, 114153, 114163, 114165, 114167, 114169, 114175, 114180, 114182, 114257)

38. ADEQUATE VENTILATION & LIGHTING: DESIGNATED AREAS; USE

POINTS
0

Inspector Comments: NOTE: All exhaust hoods shall be maintained to effectively remove heat, grease, vapors, and smoke.

Observed gaps between the hood filters above the fry station. Eliminate the gaps and maintain in good working order.

Adequate lighting shall be provided in all areas to facilitate cleaning and inspection.

Observed 2 heat lamps out at the french fry and chicken nugget hot holding unit. Replace the broken light bulbs.

Violation Description: Mechanical exhaust ventilation shall be provided to remove toxic gases, heat, grease, vapors, and smoke. All areas of a food facility shall have sufficient ventilation to facilitate proper food storage and provide a reasonable condition of comfort for each employee. Toilet rooms shall be vented to the outside air by a screened openable window, an air shaft, or a light-switch activated exhaust fan. Adequate lighting shall be provided in all areas to facilitate cleaning and inspection. Light fixtures in areas where open food is stored, served, prepared, and where utensils are washed shall be of shatterproof construction or protected with light shields. (114149, 114149.1, 114149.2, 114149.3, 114252, 114252.1)

---------------------------------	-------------------	-----------------------

40. WIPING CLOTHS: PROPERLY USED AND STORED

POINTS

1

Inspector Comments: Wiping cloths used to wipe food-contact surfaces shall be used only once unless stored in an approved sanitizer solution.

Measured a sanitizer bucket at 100ppm near the hamburger patty cold storage at the cook line and another sanitizer bucket at 100 on the right side of the cold table. Ensure sanitizer buckets are maintained at 200ppm when using quaternary ammonium.

Violation Description: Wiping cloths used to clean food spills shall be used only once, unless stored in an approved concentration of sanitizer solution and laundered daily. (114135, 114185.1, 114185.3(d-e))

Overall Inspection Comments

No summary comments have been made for this inspection.

Did you know that effective January 1, 2018, the California Health and Safety Code was amended to make it easier for food facilities to donate food? Please consider donating your excess food product to a local food bank, pantry, or soup kitchen. As a good faith food donor, you are protected from civil and criminal liability if the food product later causes harm to its recipient, unless the injury is a direct result of gross negligence or intentional misconduct in the preparation or handling of the donated food. See Section 171425 of the Civil Code and Sections 114432 to 114434 inclusive of the Health and Safety Code. For more information visit our website at www.rivcoeh.org.

REASONS FOR IMMEDIATE CLOSURE OF A FOOD FACILITY

Per California Health and Safety Code Section 114409 (a):
 "If any imminent health hazard is found, unless the hazard is immediately corrected, an enforcement officer may temporarily suspend the permit and order the food facility immediately closed."

A food facility may be closed for any of the following reasons:

- Overflowing sewage (inside or outside the facility)
- No potable water
- No hot water
- No electricity
- Rodent or insect infestation
- Any other conditions at the facility that may create an imminent public health risk

In addition to the reasons above, Per California Health and Safety Code Section 114411:

"The enforcement agency may, after providing opportunity for a hearing, modify, suspend, or revoke a permit for serious or repeated violations of any requirement of this part or for interference in the performance of the duty of the enforcement officer."

No foil or cardboard on shelves

PROPER FOOD STORAGE IN REFRIGERATORS AND FREEZERS

Store cooked and ready-to-eat food above raw food to avoid cross-contamination.
 Keep all food covered to prevent contamination

MANUAL SANITIZING OF EQUIPMENT AND UTENSILS USING A THREE COMPARTMENT SINK

1. **SCRAPE**, clean, or soak items as necessary before washing.
2. **WASH** items in detergent and hot water of at least 100°F in the first sink.
3. **RINSE** items in clear water in the second sink.
4. **SANITIZE** by submerging each item in a sanitizing solution in the third sink. Use one of the following sanitizing methods:
 - 100ppm of a chlorine based sanitizer for a minimum of 30 seconds in the solution
 - 200ppm of a quaternary ammonium based sanitizer for a minimum of 60 seconds in the solution
 - 25ppm of an iodine based sanitizer for a minimum of 60 seconds in the solution
 - Water at a temperature of 171°F for a minimum of 30 seconds in solution
5. **AIR DRY** all items on the drain board.

1 SCRAPE 2 WASH 3 RINSE 4 SANITIZE 5 AIR DRY

PROPER COOLING OF FOOD IN YOUR FACILITY

Potentially hazardous foods should always be rapidly cooled.

TIME IS THE KEY FACTOR IN PROPER COOLING

- Foods must cool from 135°F to 70°F in 2 hours or less
- Foods must cool from 70°F to 41°F in 4 hours or less

Use one of the following methods to cool food properly:

- Break large foods down into smaller portions and place in shallow pans no more than 4 inches deep. Metal pans cool better than glass or plastic pans.
- Add ice as an ingredient to replace water used in the recipe.
- Place foods within an ice bath and frequently stir the foods to speed the cooling process.
- Loosely cover foods so that heat and steam can escape during cooling.
- Arrange containers within a refrigeration unit so that air can flow properly around containers.
- Use special equipment like chill paddles or blast chillers to rapidly bring down food temperature.

Use an accurate thermometer to verify the food is being cooled within proper timeframes.

PROPER FOOD THAWING METHODS

1. Under refrigeration
2. In a microwave oven on "defrost"
3. Submerged under cold running water in an approved preparation sink for no longer than 2 hours
4. As part of the cooking process

INTERNAL COOKING TEMPERATURES

Use a probe thermometer to take internal cooking temperatures

135°F for 15 seconds	145°F for 15 seconds	145°F for 15 seconds	145°F for 15 seconds	155°F for 15 seconds	155°F for 15 seconds	165°F for 15 seconds	165°F for 15 seconds

Food temperature cannot be felt - use your probe thermometer!
