**FOOD ESTABLISHMENT INSPECTION REPORT**

FACILITY NAME Dominos	DATE 08/13/2024	PERMIT # PR0018243
--------------------------	--------------------	-----------------------

**General Comments:**

**Observations:**

**23. No rodents, insects, birds, or animals**

**Status:** OUT ( PTS)

**Inspector Comments:** Observed a few live fruit flies/gnats around the mop basin area and back dry storage area. No direct food contamination observed at this time. Use approved methods to properly clean/sanitize any affected areas and use approved pest control methods to remove the activity.

**Violation Code** - Each food facility shall be kept free of vermin. Only approved animals, such as service animals or decorative fish in aquariums, are permitted inside a food facility. (114259.1, 114259.4, 114259.5)

**34. Utensils and equipment approved, good repair**

**Status:** OUT ( PTS)

**Inspector Comments:** A) Properly resurface or replace the sections of worn/peeling shelving observed in the walk-in refrigerator and by the pizza oven.

B) Properly repair/replace the broken section of metal conveyor located on the pizza oven (no direct food contact observed).

C) Properly replace the blue dough racks used as shelving in the back storage area with approved shelving.

**Violation Code** - All utensils and equipment shall be approved and in good repair. (114130, 114130.1-114130.6, 114132, 114133, 114137, 114175, 114177, 114257)

**43. Toilet facilities: properly constructed, supplied, cleaned**

**Status:** OUT ( PTS)

**Inspector Comments:** A) Observed the toilet paper roll stored above the empty dispenser in the restroom. Properly maintain the toilet paper roll in the dispenser.

B) Properly replace the missing/worn areas of wall seal to the restroom handwash sink.

**Violation Code** - Toilet facilities shall be maintained clean, sanitary, and in good repair. Toilet rooms shall be separated by a well-fitting self-closing door. Toilet tissue shall be provided in a permanently installed dispenser at each toilet. Toilet facilities shall be provided for patrons in establishments with more than 20,000 sq. ft. and in establishments offering on-site consumption. (114250, 114250.1, 114276)

**45. Floors, walls, ceilings: good repair / fully enclosed**

**Status:** OUT ( PTS)

**Inspector Comments:** A) Properly repair the loose/missing floor coving tiles located in the utensil sink area and back storage area.

B) Adjust the ceiling panel located next to the pizza oven hood canopy to eliminate the gap.

**Violation Code** - The floors, walls, ceilings finishes must be of an approved material, durable, smooth, nonabsorbent, and

**Did you know** that effective January 1, 2018, the California Health and Safety Code was amended to make it easier for food facilities to donate food? Please consider donating your excess food product to a local food bank, pantry, or soup kitchen. As a good faith food donor, you are protected from civil and criminal liability if the food product later causes harm to its recipient, unless the injury is a direct result of gross negligence or intentional misconduct in the preparation or handling of the donated food. See Section 171425 of the Civil Code and Sections 114432 to 114434 inclusive of the Health and Safety Code. For more information visit our website at [www.rivcoeh.org](http://www.rivcoeh.org).

## REASONS FOR IMMEDIATE CLOSURE OF A FOOD FACILITY

Per California Health and Safety Code Section 114409 (a):  
 "If any imminent health hazard is found, unless the hazard is immediately corrected, an enforcement officer may temporarily suspend the permit and order the food facility immediately closed."

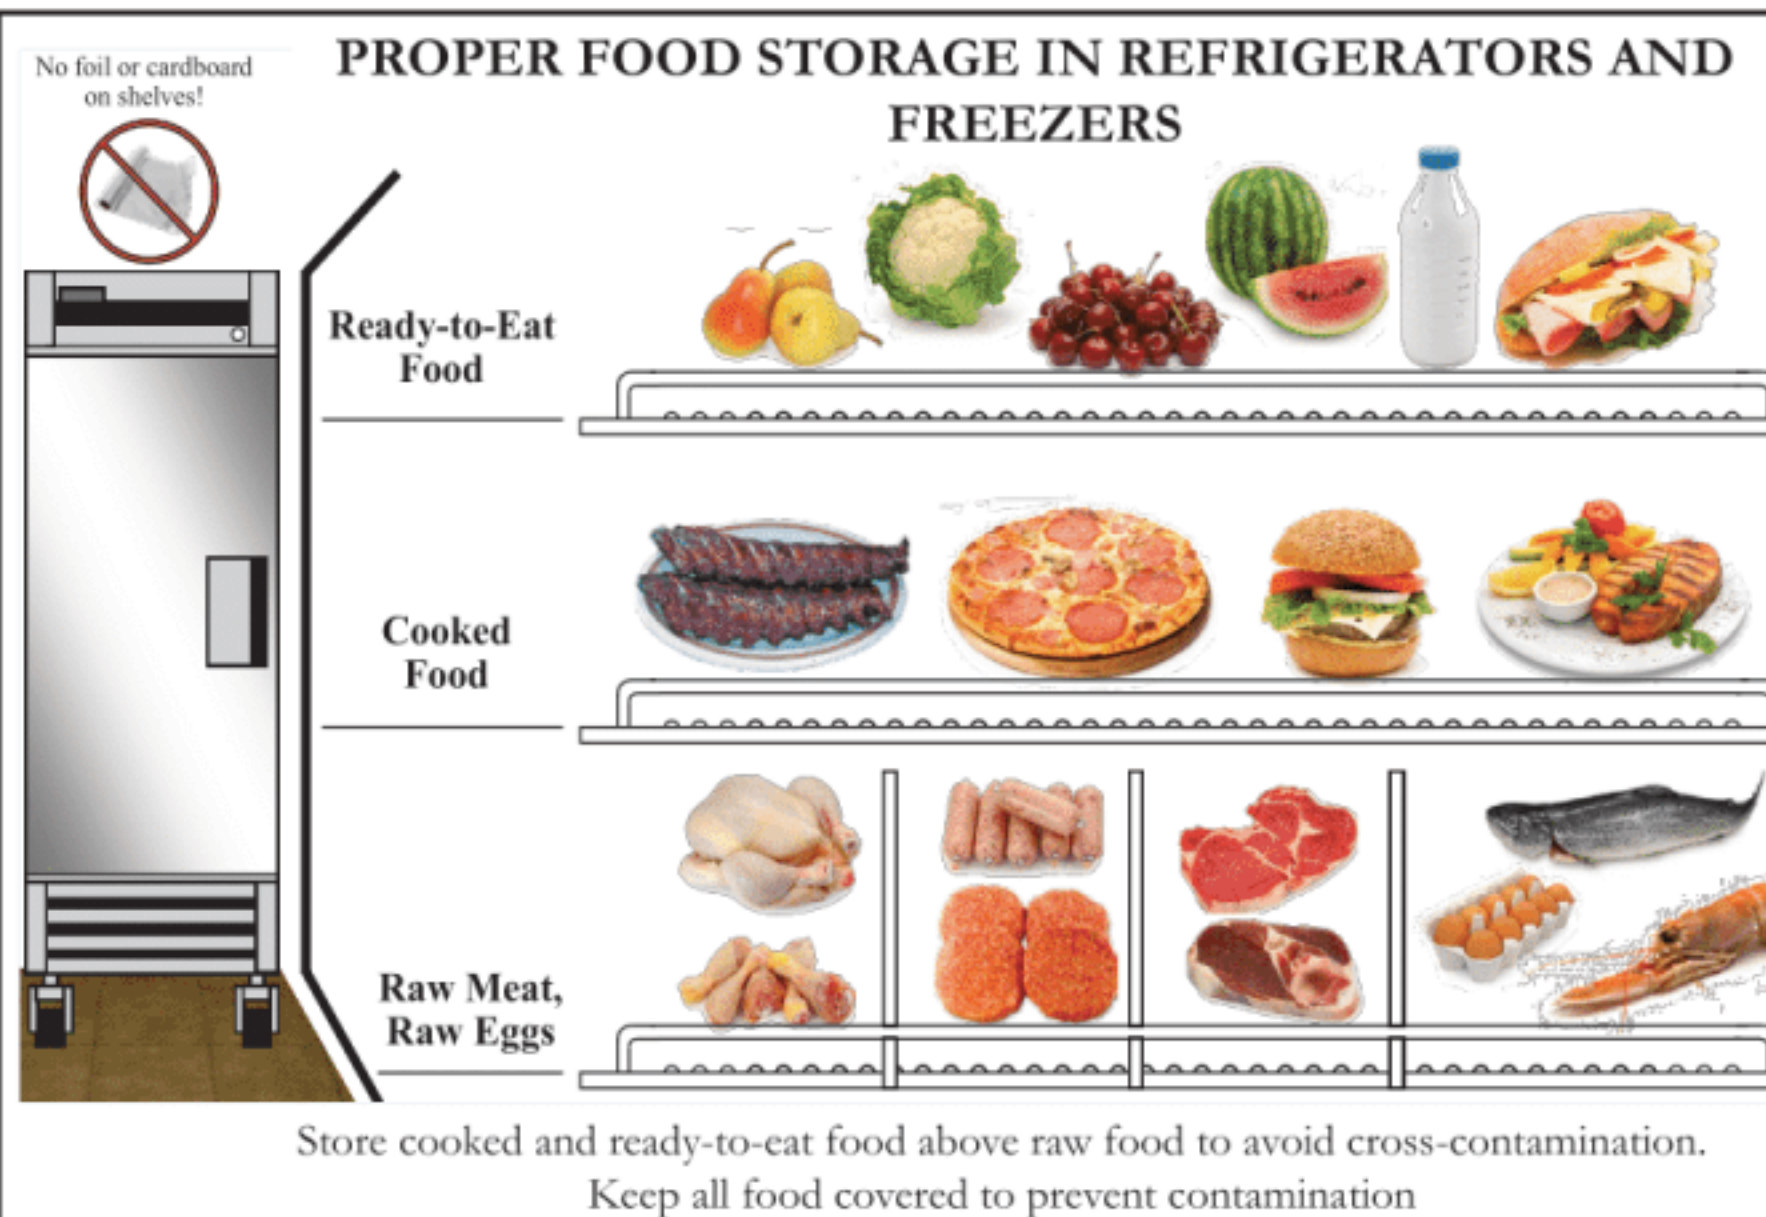

A food facility may be closed for any of the following reasons:

- Overflowing sewage (inside or outside the facility)
- No potable water
- No hot water
- No electricity
- Rodent or insect infestation
- Any other conditions at the facility that may create an imminent public health risk

In addition to the reasons above, Per California Health and Safety Code Section 114411:

"The enforcement agency may, after providing opportunity for a hearing, modify, suspend, or revoke a permit for serious or repeated violations of any requirement of this part or for interference in the performance of the duty of the enforcement officer."

### PROPER FOOD STORAGE IN REFRIGERATORS AND FREEZERS

Store cooked and ready-to-eat food above raw food to avoid cross-contamination.  
 Keep all food covered to prevent contamination

## MANUAL SANITIZING OF EQUIPMENT AND UTENSILS USING A THREE COMPARTMENT SINK

1. **SCRAPE**, clean, or soak items as necessary before washing.
2. **WASH** items in detergent and hot water of at least 100°F in the first sink.
3. **RINSE** items in clear water in the second sink.
4. **SANITIZE** by submerging each item in a sanitizing solution in the third sink. Use one of the following sanitizing methods:
  - 100ppm of a chlorine based sanitizer for a minimum of 30 seconds in the solution
  - 200ppm of a quaternary ammonium based sanitizer for a minimum of 60 seconds in the solution
  - 25ppm of an iodine based sanitizer for a minimum of 60 seconds in the solution
  - Water at a temperature of 171°F for a minimum of 30 seconds in solution
5. **AIR DRY** all items on the drain board.

## PROPER COOLING OF FOOD IN YOUR FACILITY

Potentially hazardous foods should always be rapidly cooled.

### TIME IS THE KEY FACTOR IN PROPER COOLING

- Foods must cool from 135°F to 70°F in 2 hours or less
- Foods must cool from 70°F to 41°F in 4 hours or less

Use one of the following methods to cool food properly:

- Break large foods down into smaller portions and place in shallow pans no more than 4 inches deep. Metal pans cool better than glass or plastic pans.
- Add ice as an ingredient to replace water used in the recipe.
- Place foods within an ice bath and frequently stir the foods to speed the cooling process.
- Loosely cover foods so that heat and steam can escape during cooling.
- Arrange containers within a refrigeration unit so that air can flow properly around containers.
- Use special equipment like chill paddles or blast chillers to rapidly bring down food temperature.

Use an accurate thermometer to verify the food is being cooled within proper timeframes.

## PROPER FOOD THAWING METHODS

1. Under refrigeration
2. In a microwave oven on "defrost"
3. Submerged under cold running water in an approved preparation sink for no longer than 2 hours
4. As part of the cooking process

## INTERNAL COOKING TEMPERATURES

Use a probe thermometer to take internal cooking temperatures

							
<b>135°F</b> for 15 seconds	<b>145°F</b> for 15 seconds	<b>145°F</b> for 15 seconds	<b>145°F</b> for 15 seconds	<b>155°F</b> for 15 seconds	<b>155°F</b> for 15 seconds	<b>165°F</b> for 15 seconds	<b>165°F</b> for 15 seconds

Food temperature cannot be felt - use your probe thermometer!

### THE MAJOR 8 FOOD ALLERGENS

- MILK
- EGGS
- FISH
- TREE NUTS
- PEANUTS
- SOYBEANS
- WHEAT
- SHELLFISH
