**General Comments:**

On 12/20/24 M. Ramirez conducted a complaint investigation (CO1002077) after it was alleged that a person consumed food from the facility and fell ill afterwards. At the time of inspection all food items were observed in temperature and facility was properly using time as a control at the prep line. All employees were observed to have adequate food safety knowledge, however food handler cards were observed missing. Provide proof of food handler cards within one week (12/27/24) to MirRamirez@Rivco.org. Facility stated that one employee called off sick with cold symptoms on 12/16/24 and per policy was off for three days. Employee was observed back at work on 12/20/24 and restricted to cleaning tasks at the time of inspection. No other employees had recently called off or were observed to be ill. At the time of inspection the facility was observed to be actively painting the ceiling. Facility told they may not do that during work hours to prevent contamination. Facility was also observed washing the exterior floors of the facility, which lead to waste water being tracked inside. Facility was told to properly clean and sanitize the floors.
