PERMIT # PR0059091	FACILITY DESCRIPTION FF 1-2000 SQFT Unpack	EXPIRATION DATE 01/31/2026	DISTRICT 5	SERVICE Inspection/No Score	REINSPECTION DATE Next Routine

General Comments:

Follow-up inspection conducted due to a soda machine system failure, causing water buildup inside the cabinets and insect proliferation, resulting in closure of the open foods area. At this time, the front doors of the facility were observed to be propped open due to strong odors coming from the cabinets and open foods area, per the employees. Facility was observed to have excessive buildup of dead and live gnats in the following areas:

- 1). Directly on hot dog roller equipment.
- 2). Directly inside the "fresh toppings" cooling unit.
- 3). Inside the catch basin of the soda machine.
- 4). Countertop surfaces of the open foods area.
- 5). Interior cabinets of the open foods area.
- 6). Floor sink underneath the soda machine.

Additionally, excessive black residue buildup and other debris was observed underneath the base panels of the interior bottom of multiple cabinets and behind the cabinets of the open foods area. Facility remains unapproved for reopening of the open foods area. Operator provided an invoice of the cleaning service from Refugio's Landscape, on 6/3/2025, indicating "mold removal with steam cleaner". Facility is to obtain an approved pest control service to fully eradicate all insect activity. Facility shall also continue to clean and sanitize all areas with black residue buildup. Facility shall provide adequate ventilation and ensure the front doors of the facility are remained closed. Ensure any other conditions which support insect harborage are addressed and corrected.

A follow-up inspection is scheduled for 6/11/2025 to ensure all items mentioned have been corrected in an approved manner and all insect activity is fully eradicated.
