PERMIT # PR0059091	FACILITY DESCRIPTION FF 1-2000 SQFT Unpack	EXPIRATION DATE 01/31/2026	DISTRICT 5	SERVICE Reinspection	REINSPECTION DATE Next Routine

General Comments:

6/11/25 R. George returned for follow up. Management was informed that there would be an additional cost if violations were not complete at this inspection. Mold issue persists as does the pest issues. A citation issued #1100 for Food not protected & not cleaning non food contact surfaces for a total of \$300.00.

Follow-up inspection conducted due to a soda machine system failure, causing water buildup inside the cabinets and insect proliferation, resulting in closure of the open foods area. At this time, the front doors of the facility were observed to be propped open due to strong odors coming from the cabinets and open foods area, per the employees. Facility was observed to have excessive buildup of dead and live gnats on 6/4/25 in the following areas:

- 1). Directly on hot dog roller equipment.
- 2). Directly inside the "fresh toppings" cooling unit.
- 3). Inside the catch basin of the soda machine.
- 4). Countertop surfaces of the open foods area.
- 5). Interior cabinets of the open foods area.
- 6). Floor sink underneath the soda machine.

Additionally, excessive black mold residue buildup and other debris was observed underneath the base panels of the interior bottom of multiple cabinets and behind the cabinets of the open foods area. Facility remains unapproved for reopening of the open foods area. Operator provided an invoice of the cleaning service from Refugio's Landscape, on 6/3/2025, indicating "mold removal with steam cleaner". Refugio's Landscape indicated that no mold will be present on metal cabinets, but mold exists in the floor and wall behind the cabinets, that has visible and aromatic presence of mold and debris. Facility is to obtain an approved pest control service to fully eradicate all insect activity. Facility shall also continue to clean and sanitize all areas with black mold residue buildup. Facility shall provide adequate ventilation and ensure the front doors of the facility are remained closed. Ensure any other conditions which support insect harborage are addressed and corrected.

Unless contacted prior to 6/20/2025 a follow up visit will occur. If issues are not resolved by 6/20/25, additional fines and/or removal of equipment and a hearing may take place. Contact may be made to Randell George, Debra Johnson or Allison Buse at 951-358-5172.
