General Comments:

A follow-up re-inspection from the 9/3/25 routine inspection was conducted due to a cold holding unit, used for holding hard shell eggs, being impounded for being in disrepair and not holding temperature. Upon reinspection, the cold holding unit was found to be operating at 38F. The impound tag was removed and the unit is approved for use. Continue to monitor this unit to ensure it is holding temperature and ensure all potentially hazardous food is kept at 41F and below or 135F and above to prevent foodborne illness.
