General Comments:

This follow-up inspection was initiated after the reach-in cooler (for lemonade) was impounded during the 11/17/2025 routine inspection. On this day, observed the unit to consistently maintain an ambient temperature of 35 F. The manager stated that they have adjusted their procedures to use cold water in the production of the lemonade and store the lemonade in the walk-in cooler prior transferring to the service line to ensure temperature compliance is maintained. The impound tag is removed and the unit is approved for use. Ensure all potentially hazardous foods are maintained at an internal temperature of 41 F or below.

Refer to the 11/17/2025 routine report for a full inspection.
