**General Comments:**

This site visit was conducted as a result of a complaint (CO1006867) alleging handwashing violations at the facility (not washing hands after handling money and not washing hands after touching hair). The manager, Jenny Becerra, was available for comment and stated they were unaware of the complaint. Jenny stated they have not received any complaints on their Domino's Customer Care cases and were unaware of the complaints. L. Aranda observed several handwashing violations :

1. Employee touch their airpod and continue to handle utensils to cut the pizza
2. An employee wash their hands at the sink for 2-3 seconds
3. An employee touch their hair and adjust their apron, and continue to work with food

L. Aranda discussed with manager the repeated handwashing violations at time of routine inspection and again for this complaint. L. Aranda provided the handwashing infobulletin. L. Aranda informed manager of further enforcement action if the violations are repeated.
