FOOD ESTABLISHMENT INSPECTION REPORT

FACILITY NAME Wendy's 147	DATE 04/21/2026	PERMIT # PR1006263
------------------------------	--------------------	-----------------------

General Comments:

Facility unable to provide a copy of the California Milk & Dairy License for the soft-serve machine at this time. Person in charge (PIC) stated a copy shall be submitted to this department. Ensure the Milk & Dairy License is available for future inspections.

Observations:

8. Time as a public health control; procedures and records

Status: OUT (2 PTS) **Type:** Violation

Inspector Comments: Observed two containers of sliced tomatoes with TPHC discard labels indicating the tomatoes should have been discarded and replaced an hour prior to observation. Operator stated the tomatoes were replaced with new ones an hour prior to observation, but the labels weren't updated. Operator voluntarily discarded the improperly labeled containers of tomatoes and replaced with new tomatoes from the cooler with a proper TPHC discard label. When time is used as a public health control, food must be marked with the time to be discarded, not to exceed 4 hours after being removed from temperature control.

Violation Code - When time only, rather than time in conjunction with temperature is used as a public health control, the food must be properly labeled with records and documentation maintained in the food facility and made available for inspection. (114000)

21. Hot and cold water available

Status: OUT (2 PTS) **Type:** Violation

Inspector Comments: Observed water temperature at the restroom non-adjustable handwashing sink at 93F. Conduct proper repairs such that the non-adjustable handwashing sink water temperature reaches at least 100F, but no greater than 108F.

Violation Code - An adequate, protected, pressurized, potable supply of hot water and cold water shall be provided at all times. Hot water of at least 120°F must be provided for facilities with unpackaged food. Handwashing facilities shall be equipped to provide warm water for at least 15 seconds. (113953(c), 114189, 114192 (a,d), 114192.1, 114195)

28. Food separated and protected from contamination

Status: NOTE (PTS) **Type:** Violation

Inspector Comments: Observed cases of potatoes on the floor at walk-in freezer. Facility was actively installing extra shelving into the walk-in freezer during inspection. Ensure all food items are stored at least 6 inches off the floor at all times.

Violation Code - All food shall be separated and protected from contamination. (113984, 113986, 114060, 114067(a, d, e), 114069(a, d), 114073, 114077, 114089.1 (c), 114143 (c))

37. Equipment, utensils, and linens: storage and use

Status: OUT (1 PTS) **Type:** Violation

Inspector Comments: Observed unsecured pressurized tank nearest the ice machine. Properly secure the pressurized tank to a permanent, rigid structure.

Observed ice machine's ice scoop stored in a manner which is in direct contact with pressurized tank. Store ice scoop in a protected, sanitary manner such as a dry container or inside the ice with the handle in the upright position.

REASONS FOR IMMEDIATE FACILITY CLOSURE

Per California Health and Safety Code Section 114409 (a):
 "If any imminent health hazard is found, unless the hazard is immediately corrected, an enforcement officer may temporarily suspend the permit and order the food facility immediately closed."

A food facility may be closed for any of the following reasons:

- Overflowing sewage (inside or outside the facility)
- No potable water
- No hot water
- No electricity
- Rodent or insect infestation
- Any other conditions at the facility that may create an imminent public health risk

In addition to the reasons above, per California Health and Safety Code Section 114411:
 "The enforcement agency may, after providing opportunity for a hearing, modify, suspend, or revoke a permit for serious or repeated violations of any requirement of this part or for interference in the performance of the duty of the enforcement officer."

PROPER COOLING OF FOOD IN YOUR FACILITY

Potentially hazardous foods should always be rapidly cooled.

Time is the key factor in proper cooling

- Foods must cool from 135°F to 70°F in 2 hours or less
- Foods must cool from 70°F to 41°F in 4 hours or less

Use one of the following methods to cool food properly:

- Break large foods down into smaller portions and place in shallow pans no more than 4 inches deep. Metal pans cool better than glass or plastic pans.
- Add ice as an ingredient to replace water used in the recipe.
- Place foods within an ice bath and frequently stir the foods to speed the cooling process.
- Loosely cover foods so that heat and steam can escape during cooling.
- Arrange containers within a refrigeration unit so that air can flow properly around containers.
- Use special equipment like chill paddles or blast chillers to rapidly bring down food temperature.

Use an accurate thermometer to verify the food is being cooled within proper time frames.

MANUAL SANITIZING OF EQUIPMENT AND UTENSILS USING A 3-COMPARTMENT SINK

1. **SCRAPE**, clean, or soak items as necessary before washing.
2. **WASH** items in detergent and hot water of at least 100°F in the first sink.
3. **RINSE** items in clear water in the second sink.
4. **SANITIZE** by submerging each item in a sanitizing solution in the third sink.

Use one of the following sanitizing methods:

- 100ppm of a chlorine based sanitizer for a minimum of 30 seconds in the solution
- 200ppm of a quaternary ammonium based sanitizer for a minimum of 60 seconds in the solution
- 25ppm of an iodine based sanitizer for a minimum of 60 seconds in the solution
- Water at a temperature of 171°F for a minimum of 30 seconds in solution

5. **AIR DRY** all items on the drain board.

PROPER FOOD THAWING METHODS

- Under refrigeration
- In a microwave oven on "defrost"
- Submerged under cold running water in an approved preparation sink for no longer than 2 hours
- As part of the cooking process

9 MAJOR FOOD ALLERGENS

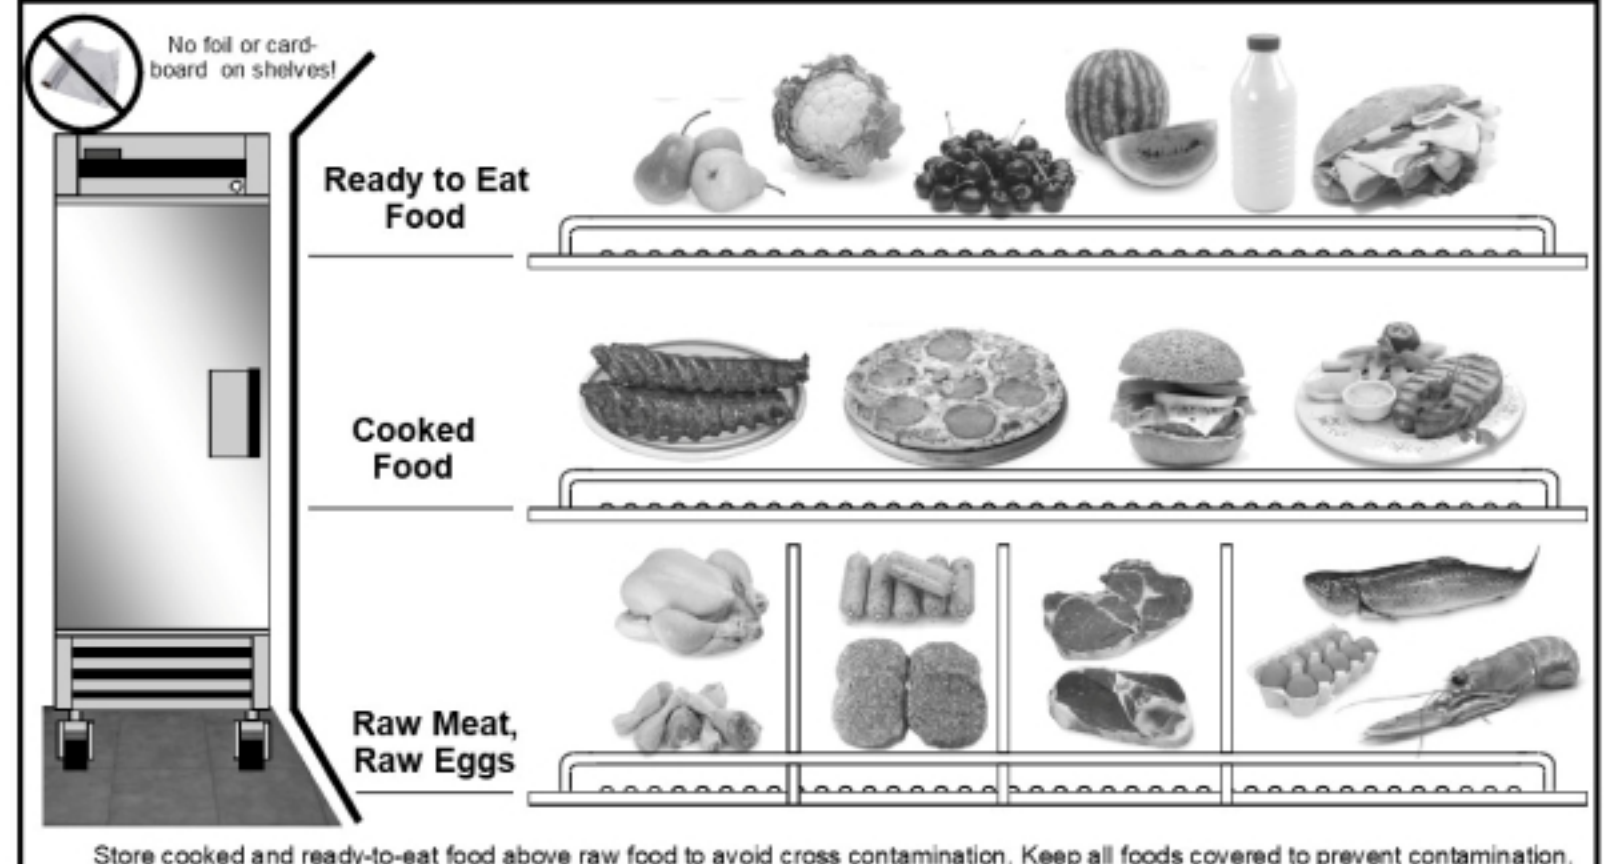

- Milk
- Eggs
- Peanuts
- Tree nuts (e.g., almonds, walnuts, cashews)
- Fish (e.g., salmon, tuna, cod)
- Shellfish (e.g., shrimp, crab, lobster)
- Wheat
- Soy
- Sesame

INTERNAL COOKING TEMPERATURES

Use a probe thermometer to take internal cooking temperatures

135°F for 15 seconds	145°F for 15 seconds	145°F for 15 seconds	145°F for 15 seconds	155°F for 15 seconds	155°F for 15 seconds	165°F for 15 seconds	165°F for 15 seconds

PROPER FOOD STORAGE IN REFRIGERATORS AND FREEZERS

Did you know you are protected from civil and criminal liability when donating food? The Federal Good Samaritan Food Donation Act (Civil Code, 171425) provides liability protections for good faith donations of surplus food. The California Good Samaritan Food Donation Act (California Retail Food Code, 114432) further expands the list of entities covered by the protection. It also allows for direct donation to a person from regulated and inspected facilities in addition to stating past-date food is subject to liability protection. Please consider donating your excess food product to a local food recovery organization. For more information visit our website at www.rivcoeh.org.
